Claims 1-6 have been canceled. Claims 7, 9-14, 20-23 are still at issue and are present for examination.

Applicants' arguments filed on 11/12/2008, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

On 2/12/09 the examiner called applicant (Ms. Susan Dadio) to propose an amendment to put the claims in condition for allowance but said negotiation did not result in allowance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 20 is indefinite because it does not further limit the invention of base claim 7. In claim 7, ECSOD is from a human source, wherein humans are mammals by inherency. Therefore, claim 20 appears to be redundant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1656

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 20-21 remain rejected under 35 U.S.C. 102(b) as being anticipated by Hersh (U.S. patent No. 6,011,067, 6/2000). Hersh teaches and claims (see for example column 8 and claim 25) methods of treating human skin to treat psoriasis and dermatitis symptoms comprising administering a composition comprising superoxide dismutase (SOD). In column 8 Hersh teaches that SOD may be the extracellular type (i.e. ECSOD), which inherently comprises SEQ ID NO:11 of this invention.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
